# **Genetic architecture of prezygotic reproductive isolation in the parasitic wasp genus *Nasonia***

Wenwen Diao

The research described in this thesis was carried out in the Evolutionary Genetics, Development and Behaviour group at the Center of Ecology and Evolutionary Studies (CEES) - from 2015 onwards known as the Groningen Institute for Evolutionary Life Sciences (GELIFES) - of the University of Groningen, The Netherlands, according to the requirements of the Graduate School of Science (Faculty of Science and Engineering, University of Groningen).

This research was funded by the EU Marie Curie Initial Training Network “Understanding the evolutionary origin of biological diversity” (ITN-2008-213780-SPECIATION). The printing of this thesis was supported by the University of Groningen and the Faculty of Science and Engineering.

## **PhD thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 28 November 2017 at 11.00 hours

by

**Wenwen Diao**

born on 14 April 1982  
in Weifang, China

**Supervisor**

Prof. L.W. Beukeboom

**Co-supervisor**

Dr. L.P.W.G.M. Jacobus Mgn Van De Zande

**Assessment committee**

Prof. A.G.G. Groothuis

Prof. J. Ruther

Prof. J.R. Gadau
